## E-LEARNING IN INTERNATIONAL SOLIDARITY

### OVERVIEW

---

**An e-learning to prepare yourself to integrate a health development program and train at your own pace and / or in parallel with your professional activity.**

The skills acquired during this training will enable you to be able **to integrate actively and effectively a health development program**, in emergencies and / or insecurity place, in collaboration with local actors.

### TARGETED SKILLS

---

- Knowledge about the current health issues and major challenges
- Knowledge about the organization and actors involved in community health, as well as the corresponding legal and ethical principles
- Acquiring some project management tools and techniques
- Understanding action issues in an intercultural context
- Being able to act in emergency and / or insecure situations
- Strengthen knowledge in tropical pathology

## ADMISSION REQUISITES

---

3 years of study (or equivalent) in Biological Sciences or Medical Sciences, or 3 years of proven experience in community health.

## FIELD MISSION

---

### The field mission

Realization of a field mission lasting 3 to 6 months in France or abroad, in a field linked to health: hygiene education, local development linked to community health, to the environment health ...

Feedback, with production and presentation of an activity report.

**This mission is mandatory to obtain the university degree.**

## Why choose our Degree in International solidarity?

**Home training  
at your own  
pace**

**Lessons  
provided by  
experts in the  
field**

**A platform for  
exchanges  
between  
students and  
speakers**
